Art Unit: 3728

1. Restriction to one of the following inventions is required under 35

U.S.C. § 121:

I. Claims 1-14, drawn to a procedure for the replicative fabrication of at least one microstructured molded part, classified in Class 264, subclass ?.

II. Claims 15-25, drawn to a magazine with at least one microstructured molded part, classified in Class 206, subclass 701.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product can be made by a different process, such as a process which does not use tool halves or a process in which there is no simultaneous demolding of the magazine and the microstructured molded part.

Art Unit: 3728

3. Because these inventions are distinct for the reasons given above and are classified in different locations, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
